PROFESSIONAL SUMMARY

Final-year Computer Science and Engineering (AI & ML) student passionate about developing innovative AI-powered solutions for real-world problems. Demonstrated ability to build impactful projects through academic and internship experience, with a commitment to continuous learning, problem-solving, and delivering high-quality software solutions.

EDUCATION

VSB Engineering College

B.E Computer Science and Engineering (AI & ML) — CGPA: 7.7

Karur, Tamil Nadu

2023 – 2027

EXPERIENCE

Machine Learning Intern – CodeAlpha (Virtual)

Jan 2026 – Feb 2026

- Developed a Handwritten Character Recognition system using supervised learning techniques.
- Built an Emotion Recognition model from speech using audio feature extraction.
- Designed a Credit Scoring prediction model for loan eligibility assessment.
- Performed data preprocessing and model evaluation using Python and Scikit-learn.

Intern – Infosys Springboard (Virtual)

Feb 2025 – Mar 2025

- Worked with Git branching strategy in a collaborative development environment.
- Implemented features following structured project workflow.
- Strengthened understanding of version control and team-based development.

PROJECTS

BudgetWise AI | GitHub

- Developed an AI-powered personal finance assistant to create personalized monthly budgets based on user income, expenses, and financial goals.
- Integrated the Gemini API to generate intelligent budgeting recommendations, spending insights, and personalized savings strategies.
- Built secure user authentication, expense tracking, income management, and financial data storage using FastAPI and MongoDB.
- Designed an interactive dashboard with spending analytics, budget visualization, expense categorization, and future expense forecasting.

Pest Detection Agent | GitHub

- Developed an AI-powered crop disease detection platform that identifies plant diseases from uploaded leaf images using a two-stage AI pipeline.
- Integrated Google Gemini API to classify crop diseases and generate detailed treatment reports including symptoms, causes, prevention, and farmer recommendations.
- Implemented persistent disease scan history and designed an interactive dashboard for reviewing previous diagnoses and AI-generated recommendations.

Online Auction Bazaar | GitHub

- Developed a web-based auction platform using Spring Boot and MySQL.
- Implemented user registration and role-based access control.
- Built bidding functionality with validation logic.
- Integrated REST APIs with frontend for dynamic data handling.

CERTIFICATIONS

Java Foundation Certification – Infosys Springboard

Introduction to SQL – Simplilearn

Machine Learning Internship Certificate – CodeAlpha

TECHNICAL SKILLS

Languages: Java, Python

Frontend: HTML(Basic)

Database: MySQL, PostgreSQL
